ABOUT ME

Software Engineer with internship experience developing scalable applications and backend systems. Strong foundation in full-stack development, microservices architecture, and software engineering best practices.

EXPERIENCE

Liziris

Software Engineer Intern

Jan 2025 – Jul 2025

- Developed REST APIs and full-stack features for the **Loyalty** food ordering platform, implementing authentication, authorization, cart management, food ordering, and payment workflows using Node.js and React.js.
- Implemented pagination and resolved chat message retrieval issues for **Gidz Uni Path**, improving communication reliability between users and administrators using React.js and Node.js.
- Resolved search and routing issues in the **EziChoice** e-commerce platform and optimized paginated product listings, improving product discoverability and application performance.
- Integrated authentication and code editor functionality for **CodeDemo** and optimized code execution requests with 2 seconds timeout mechanism to improve system responsiveness.

EDUCATION

University of Moratuwa

B.Sc. Engineering (Hons) in Computer Science and Engineering

2022 – 2026

St. John's College, Jaffna

GCE Advanced Level – Physical Science Stream

2020

- 3A Passes | District Rank – 28

PROJECTS

Sparta Education Platform (Personal Project, Nov 2025 – May 2026)

Tech Stack: React.js | Spring Boot | MongoDB | AWS S3 | RabbitMQ | Redis

- Designed a microservices oriented educational video streaming platform comprising 4 services for secure and scalable content delivery.
- Implemented JWT authentication, role based authorization, OTP verification, and token blacklisting to secure user access and session management.
- Built a resilient media processing pipeline with resumable uploads, AWS S3 storage, and RabbitMQ asynchronous processing for reliable video handling.
- Established service-to-service communication using gRPC and REST APIs to enable efficient interactions within a microservices architecture.

Medical Care Management System (Semester 5 Project, Jul 2024 – Nov 2024)

Tech Stack: React.js | Node.js | Express.js | PostgreSQL | REST APIs

- Developed a medical care management system supporting patients, doctors, and administrators using React.js and Node.js.
- Implemented RESTful APIs for appointment scheduling, doctor queue management, and patient feedback processing to streamline healthcare workflows using Express.js.
- Secured administrative and doctor portals through role-based access control (RBAC) to enforce authorization and data privacy.
- Designed normalized PostgreSQL schemas and optimized database queries to improve data consistency and retrieval efficiency.

HR Management System (Semester 3 Project, Jul 2023 – Nov 2023)

Tech Stack: React.js | Node.js | Express.js | MySQL

- Developed a web application HR management system to streamline employee and leave management processes using React.js and Node.js.
- Implemented employee authentication, profile management, and leave request workflows to improve workforce self-service capabilities.
- Designed and integrated RESTful APIs to enable secure authentication and efficient employee data management using Express.js.
- Built relational database schemas with indexing and triggers to improve data consistency and query performance in MySQL.
- Optimized request validation and API response handling to enhance application reliability and user experience.

Enhancing ASR for Tamil English code switching (Research & Development Project, Jul 2025 – May 2026)

- Developed a Tamil–English code-switched ASR system by fine-tuning the Vasista22 Large v2 Whisper model using LoRA.
- Designed a token-level correction pipeline to improve English root-word and suffix prediction in mixed-language transcripts using XLM-R.
- Implemented sentence-level correction with confidence-guided hint generation to improve transcription accuracy using mT5.
- Introduced a novel word-level classification and hint-based correction approach, reducing Word Error Rate (WER) to 13.51%.

SKILLS

- **Programming Languages** - Java, Python, JavaScript, C++, Dart
- **Frontend Development** - React.js, Next.js, HTML, CSS, Bootstrap, Flutter
- **Backend Development** - Node.js, Express.js, Spring Boot, REST APIs
- **Databases** - PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps** - Docker, AWS S3, RabbitMQ, Git, GitHub, CI/CD, GitHub Actions
- **Professional Skills** - Problem Solving, Communication, Team Collaboration, Adaptability

CERTIFICATIONS & ACTIVITIES

Certifications

- Python Basic
- Java Basic
- AWS Cloud Practitioner Essentials

Activities

- Member of Tamil Literary Association – University of Moratuwa
- U-15 School Cricket Quarter Finalist
